

A Small Reproducible Study

Author One; Author Two

Abstract

This synthetic paper provides a legal fixture.

1 Introduction

The left column contains short prose with a displayed equation.

The fixture deliberately uses only ASCII text and vector rules.

$$p(x) = \sum_i w_i * x_i / n$$

2 Method

A header, two columns, a formula,
and a table form the evaluation set.

3 Results

The right column starts independently.

Table 1 reports deliberately simple reference values.

Metric	Value
precision	0.80
recall	0.75

4 Discussion

The footer is intentionally outside both content columns.
